EDUCATION

MASTER OF COMPUTER SCIENCE

UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN ; GPA : 4.0/4.0

Dec 2023

Illinois, USA

B.ENG IN COMPUTER SCIENCE

ANNA UNIVERSITY ; GPA : 9.54/10.0

May 2021

Chennai, India

EXPERIENCE

SOFTWARE ENGINEER @ FRESHWORKS

BACK-END | JAVA | MySQL | SPRING BOOT | REST API

July 2021 – April 2022

Chennai, India

- Upgraded the build tool (**Gradle**) used in the product, reducing the build time to 8 minutes from >13 minutes.
- Reduced the network traffic overload of the Freshmarketer product by >40% by changing the product's **monolith** background server to multiple layers of **microservices**.
- Reduced the processing time of the sign-up requests by 30% by making the sign-up callback an **asynchronous** process.
- Improved the email deliverability of the product by disabling the outgoing email services of new users with low spam scores, reducing the overall spam score percentage of the product by 50%.
- Introduced a separate email domain for free and paid customers by checking the version of the product that the customer has purchased.

SOFTWARE ENGINEER INTERN @ FRESHWORKS

BACK-END | JAVA | MySQL | SPRING BOOT | REST API

Feb 2021 – June 2021

Chennai, India

- Developed a **Staging Stack system** for Freshmarketer's test engineers where they can update and release the usage of different test stacks.
- Developed de-duplication algorithms to ensure appropriate email-deliverability metrics with the help of **Redis Cache**.
- Collaborated with the Freshsales product team and added a **new landing page feature** in the customer timeline within 2 days, meeting the customer's deadline.

PERSONAL PROJECTS / PUBLICATIONS

TAG-ME-IN

Node.js | EXPRESS | MySQL | ReactJS

- Built a **carpooling application** that helps the **University of Illinois students** to find people going to similar places and tag along with them.
- Developed the front end using **React.js** and the back end using **Node.js** and **MySQL**.

THE DISEASE PREDICTOR

PYTHON | JAVA

- Built an android application that predicts different types of external diseases on eyes, skin, mouth, and nails with an image input using **Convolutional Neural Networks** with 89% accuracy. Created the dataset from scratch by web scraping.
- Won the **Most Feasible Project Award** in a 36-hour hackathon conducted by ACM, SVCE.
- github.com/harshith2000/The-Disease-Predictor

EXTRACURRICULAR ACTIVITIES

VICE PRESIDENT

Know-I (AI Research Club)

June 2020 – Apr 2021

Anna University

- Organized various technical events like Coding Competitions, Paper Presentations, and Ideathons.
- Conducted seminars where I got the opportunity to teach the fundamentals of CS to my juniors.

JOINT SECRETARY

Association of Computer Engineers (ACE)

Aug 2019 – May 2020

Anna University

- Organized numerous technical and non-technical events, including Workshops, Seminars, and Project Presentations.
- Organized two national-level technical symposiums and a 24-hour hackathon.

TECHNICAL SKILLS

Languages

C++, Python, Java, SQL, Javascript

Tools & Frameworks

Git, MySQL, MongoDB, Neo4j, Spring Boot, Node.js, React.js, AWS, Linux.
